

PROCESS CLEANERS

AR 250 Cleaner/Degreaser

Mild Alkaline Process Cleaner

Metalworking & Automotive

A mildly alkaline cleaner used in metalworking plants and automotive remanufacturing as a spray or soak cleaner for removing drawing and buffing compounds, stamping lubricants, cutting oils, or other fabricating soils from aluminum, steel, stainless steel, and plastic.

No Solvents Required

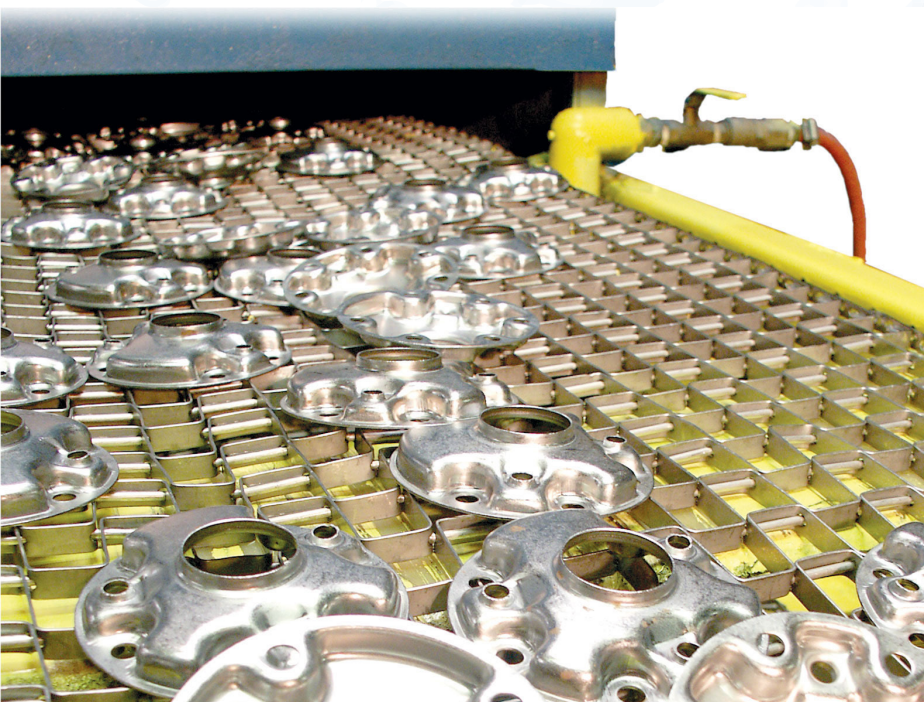

Due to its efficient cleaning effect on organic soils such as grease and oil, it can often replace many solvent cleaners and degreasers. AR 250 is free rinsing and low foam.

Safe

AR 250 is safe on all ferrous and non-ferrous materials and waste water friendly.

Application

Fill tank with desired amount of water. Start heating water and add AR 250 while agitating. The exact quantity to be used will depend on amount and type of soil. Consult with your representative for recommendations.

Technical Data

appearance	clear liquid
odor	mild
specific gravity	1.2 - 1.25
maximum solubility	complete
rinsability	good
biodegradable	yes
normal working conc.	
spray	2-5%
soak	5-10%
normal working temps	100 - 160° F

Packaging Options

5 gallon pail
55 gallon drum
330 gallon tote tanks

Other Available TLS Products

ID 240
Industrial strength cleaner/degreaser

Shur Cool® 3830
Non-foaming full synthetic coolant for grinding, milling, drilling and other metalworking operations

Shur Cool® 4045
Heavy-duty semi synthetic metalworking fluid
